

NAMA SAI SRIMANNARAYANA

Data Analyst

Kanigiri, Andhra Pradesh, India • +91 93912 21643 • namasriman5@gmail.com • [LinkedIn](#) • [GitHub](#) • [Portfolio](#)

PROFESSIONAL SUMMARY

Data Analyst and B.Tech Computer Science (AI & ML) graduate with hands-on experience in data cleaning, exploratory data analysis (EDA), SQL querying, and Power BI dashboard development. Skilled in translating raw business data into actionable insights using Python, MySQL, Excel, and Power BI, with additional experience in requirements gathering and stakeholder-ready reporting. Delivered two end-to-end analytics projects spanning 60,000+ combined records, including a customer segmentation model (87% accuracy) and a banking churn dashboard that surfaced a ~20% churn rate. Seeking to bring the same rigor to a Data Analyst, Business Analyst, or SQL Developer role.

CORE SKILLS

Data Analysis & Reporting: Exploratory Data Analysis (EDA), Data Cleaning, Statistical Analysis, KPI Reporting, RFM Analysis, A/B Testing Fundamentals, Requirements Gathering

SQL & Databases: MySQL, Complex Joins & Subqueries, Aggregate & Window Functions, Stored Procedures, Query Optimization, ETL & Data Pipelines

Visualization & BI: Power BI (DAX, Dashboards), Excel (Pivot Tables, VLOOKUP), Matplotlib, Seaborn, Business Reporting

Programming & ML: Python (Pandas, NumPy, Scikit-learn), FastAPI, Streamlit, Regression, Classification, Clustering (KMeans), PCA, XGBoost, Random Forest

PROFESSIONAL EXPERIENCE

Acenaar Technologies — Kurnool

Artificial Intelligence Intern | Jan 2026 – Mar 2026

- **Data extraction & parsing:** designed and deployed an AI-powered PDF chatbot that parsed structured and unstructured text from complex documents, turning raw files into clean, queryable data for downstream analysis.
- **Applied NLP/RAG techniques:** implemented Retrieval-Augmented Generation (RAG) pipelines and vector databases to index text embeddings, enabling accurate, real-time information retrieval across multi-file datasets.
- **Full-stack delivery:** built a Streamlit/Flask application supporting multi-file uploads and persistent session memory, collaborating cross-functionally to ship a working product end-to-end.

DATA ANALYTICS PROJECTS

Customer Purchase Prediction using Machine Learning

- **Analyzed 50,000+** retail transaction records and engineered 15+ RFM (Recency, Frequency, Monetary) features to predict 30-day repurchase likelihood for customer segmentation.
- **Reduced dimensionality by 40%** using PCA and segmented customers into 5 actionable clusters via KMeans for targeted marketing strategy.
- **Achieved 87% model accuracy** training XGBoost and Random Forest classifiers, deploying the model via FastAPI for real-time business use.

Banking Customer Churn Analysis

- **Built an end-to-end churn analysis pipeline** on 10,000+ banking records using Python, MySQL, and Power BI, identifying a ~20% churn rate and its top 5 drivers through exploratory data analysis.
- **Wrote 10+ SQL queries** (joins, aggregations, subqueries) to extract business KPIs and answer ad-hoc reporting requests.
- **Delivered a 5-page interactive Power BI dashboard** covering demographics, churn trends, and balance analysis for stakeholder decision-making.

EDUCATION

Bachelor of Technology — Computer Science (Artificial Intelligence & Machine Learning)

Sreenivasa Institute of Technology and Management Studies, Chittoor, Andhra Pradesh | 2022 – 2026 | CGPA: 7.46 / 10

CERTIFICATIONS

- Machine Learning Using Python Programming — SWAYAM / Banaras Hindu University (BHU), Apr 2025. 8-week certification covering ML model design, training, and evaluation; validated via proctored exam.
